Game On Goes Mobile.

(Richmond, VA) Since its broad release in 2005, Game On recruiting software has been in demand. With easy access to recruiting information on the desktop or laptop computer, the Game On software makes it easy for college coaches to keep track of the contacts and discussions they have with prospects, to generate mass emails and letters, to track prospect evaluations, and more.

Now, Game On puts that recruiting information in the palm of your hand. With the release of Game On Mobile Tools for Palm, coaches can load their prospect information on their Palm devices, access their prospects, record calls, contact, evaluations and more.

It's easy to install, easy to use, and best of all, it's in the palm of your hand.

Coming soon is Game On Mobile Tools for Pocket PC. With the same functionality, coaches will be able to take Game On with them on Windows Mobile devices.

For a limited time, Game On is offering its Mobile Tools products free with the full price purchase of the desktop/laptop software. Game On's ease of use, affordability, and adaptability to any program's needs makes the software a must have for every college athletics program.
